

Carer Connect – Ready Response pilot.

Information for foster carers

What is the Ready Response pilot?

- The ability for foster carers to be nominated when they can provide short-term emergency and/or same day care arrangements.
- For this availability information to be shared with their agency and the Department.
- When needed the Department will contact carers direct to discuss emergent care arrangement request based on their nominated availability.
- Additional financial support for up to 7 days will be provided when care arrangements are supported by identifying carer availability using the app and carers are nominated by agencies or contracted directly by the department.

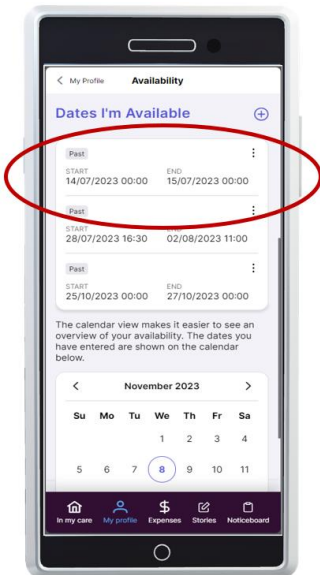

Why are we piloting Ready Response?

To reduce the number of children and young people needing to be placed in short term residential care due to limited carer capacity.

Who is participating in the pilot (which regions)?

The following regions are participating in the pilot: North Queensland, Sunshine Coast and Central, Brisbane Moreton Bay, South East and South West.

When does the pilot start: Go live date will be 20th November 2023.

What makes you eligible as a foster carer for Ready Response?

- have a Foster Carer Agreement that supports emergency care (same day and/or after-hours considerations).
- be registered and use Carer Connect to identify your availability in advance and let us know how you would want to be contacted.
- agree for your regional PSU/PSS or Child Safety After Hours Service to contact you directly about any placement requests.
- Input your availability in Carer Connect up to 1 month in advance, including if you can care for sibling groups and provide transport (these are options)
- you will have \ control over your own availability.

Important to remember:

Foster carers must continue to respond to a care arrangement request via the usual referral process with their foster care agency. Agencies will be notified of availability promoted by carers and may nominate carers as a Ready Response care arrangement option through normal processes. Ready Response will only be used by the Department in response to emergent need.
