| What is the Plant that presents a risk / hazard?                                   | What part of the premises is affected? | Prevention to minimise risk |
|--|--|-----------------------------|
|  |  | E                           |

Please identify the likelihood of risk.

Please circle on table below:

| What are the consequences of someone being injured, exposed, or potential death? | How likely is it to occur? |                       |                            |                                      |
|--|----------------------------|-----------------------|----------------------------|--------------------------------------|
|  | Could happen anytime       | Could happen sometime | Could happen but very rare | Could happen but probably never will |
| Death or permanent disability  | H                          | H                     | H                          | M                                    |
| Severe injury or illness   | H                          | H                     | M                          | M                                    |
| Medical attention required   | H                          | M                     | M                          | L                                    |
| Pain, the discomfort experienced, first aid required                             | M                          | M                     | L                          | L                                    |

H = High Risk M = Medium Risk L = Low Risk

The level of risk is the combination of the consequences and the likelihood of a specific risk.

Examples of low risks include: An event that is likely to occur but has minimal consequences or an event that is extraordinarily unlikely to occur but has moderately severe consequences.

Examples of Medium Risk include: An event that is likely to occur but has moderate consequences or an event that is extraordinarily unlikely to occur but has highly severe consequences.

Examples of high risks (Catastrophic) include: An event that is likely to occur and has highly severe consequences. An event that is extraordinarily unlikely to occur but has catastrophic consequences.

Where the risk is **High Risk** unless the control applied reduces the risk to Medium or Low this activity will not be approved by the Nominated Supervisor.
